ASTRO™ GPS-BASED
DOG TRACKING SYSTEM**

The Astro™ System is comprised of 2 components: Astro™ 220 handheld receiver and DC 40 dog-collar transmitter. Astro™ can track up to 10 dogs at once and has the ability to update dog's position every 5 seconds. System can reach up to 5 miles in flat, unobstructed terrain. Astro™ 220 serves as a full-featured handheld GPS unit. It contains features such as a high-sensitivity GPS receiver, long battery life, a bright sunlight readable color display and a rugged IPX7 waterproof exterior. This unit also offers automatic routing w/turn-by-turn directions. Micro SD card slot so you can add preprogrammed data cards w/detailed maps such as TOPO®, Inland Lakes, BlueChart® and City Navigator®. **Bundle** includes: Astro 220, DC 40, vehicle power cable, AC charger, USB cable, Trip & Waypoint manager, owner's manual & quick start guide. **DC 40 Collar:** High-sensitivity GPS receiver & VHF antenna into an all-in-one transmitter that works w/Astro® 220. Durable, one-inch orange polyurethane collar that fits most e-collar receivers — eliminating the need to put two separate collars on a dog. Extend the battery life of the DC 40 by changing the position transmit rate from 5 to 10, 30, or 120 seconds, enabling the DC 40 to work up to 17-48 hours in the field on one charge.
